

**Tri-Fold Printing:**

The tri-fold included in this download is made for borderless Letter Size (8.5x11) paper. It is black & white to reduce ink consumption and work with a variety of printers, scanners, and copy machines. If you wish to print this tri-fold be sure to select Two-Sided before printing. If your printer does not support 2-sided printing, you can simply print Page 1 first, and print Page 2 on the backside of Page 1.

**Profile Frame:**

Meta no longer allows unverified organizations to produce Profile Image Frames for Facebook. So (as with any platform that does not support profile frames) unofficial frames have to be applied manually using photo editing software. One free option is the program GIMP. Regardless of software, what you want to do is place the Profile Frame as a new Layer above whatever image you'd like to use as a profile picture. You may need to crop or scale your profile picture to fit the dimensions of the frame (1000px by 1000px).
